

## Why Choose Us?

The average insurance plan costs an employer more than \$13,500 *per employee per year*. \* Most Small and Medium Businesses do not offer health insurance. In fact, less than half (47%) offer health benefits. \*\*

A study by the Wyoming Department of Economic Research found that the high cost of insurance coverage was the primary reason why employers did not offer coverage. \*\*\*. However, not providing some sort of prescription or health benefit resulted in **higher levels of employee turnover and dissatisfaction**.

**At Pill Pals, we help Businesses find a happy medium.** We provide Employer Sponsored Clinical Programs that help address some of the top 10 leading causes of death in the United States:

- **High Cholesterol**
- **High Blood Pressure**
- **Type II Diabetes**
- **Mental Health Issues**

We also provide a **Reproductive Health Package** for both men and women. These awesome programs include **FREE DRUGS, FREE ANTIBIOTICS, AND FREE VITAMINS**. If you don't see what you're looking for, send us an email and we can create a customized package for your company:
